The Invacare® BAR600IVC Bariatric Bed is a heavy-duty full-electric bed frame designed for bariatric individuals. It is capable of supporting patients who weigh up to 600 lb. The bed frame extends to the edges of the bed deck for better support than most other split-spring bariatric beds. Using the hand pendant, the patient or caregiver is able to change the positioning of the head and foot sections, as well as the bed height. Despite being substantial in size, bed setup within the home is easy – no special tools are needed.

Invacare beds, mattresses and rails, excluding therapeutic support surfaces and bariatric beds, when used as a system and sold new and unused after August 1, 2007, meet the voluntary FDA Guidelines for bed rail entrapment. Visit www.invacare.com/bedsafety for additional safety and entrapment information.
Features

Heavy-duty frame design ensures added strength for client support.

Heavy-duty bed sleep surface is 17% larger than conventional beds to ensure comfortable positioning.

Split-spring design with universal bed ends for ease in setup.

No special tools necessary for in-home setup.

Easy-release motor mounts allow quick motor removal.

Robotically welded, steel frame construction.

Pendant allows for dynamic client positioning.

Quiet, smooth operation.

Use with Invacare bariatric mattress (BARMATT42) and bed rails (BAR6640IVC):

- BARMATT42 meets fire safety regulations 16CFR1633 and 16CFR1632

600 lb. Client weight capacity.
