Express Yourself in Dance

Dance incorporates so much. It is artful, athletic and precise combined with speed, grace and skill. Plus it is FUN. With the Twirl wheelchair’s streamlined design, robust center-of-gravity and, special dance anti-tip you will spin like a top and set the dance floor on fire. Just dance with the Invacare® Top End® Twirl™ Dance Wheelchair.
The dance anti-tip is a standard with the Twirl wheelchair’s aggressive center-of-gravity. It is both removable and adjustable, plus it features a swivel caster that spins when you do.

Got Rhythm?
Wheelchair dancing takes many forms: in a group with other wheelchair users or able-bodied dance partners, in a ballroom dancing troupe, as a couple – it takes two to tango – or even individual freestyle, there’s a ‘move and a groove’ for everybody.

The aggressive center-of-gravity lets you twirl, plus adjustments are quick and easy.
Integrated dance...
A worldwide movement that is growing in popularity

Wheelchair dancing is now recognized as an official international Paralympic sport. With an increasing number of dance centers and organizations, wheelchair users can learn to dance socially or competitively, participating in their favorite dance styles, which include square dancing, line dancing, ballet, jazz, Latin American and traditional ballroom dancing.
